

Believing in Brighter Futures

Since 1994, CNI College in Orange, California has been offering career-oriented programs related to the health care industry. CNI College is committed to providing excellent academic educational opportunities in allied health disciplines for the intellectual, social and professional development of a diverse student population. CNI is devoted to the community we serve and committed to our graduates' successful employment in the healthcare field.

By choosing CNI College for your post-secondary education, you can learn from qualified instructors who bring both academic and professional experience into the classroom. Each program is designed to include theoretical and practical education. The programs provide real-life experience through externship and clinical opportunities, as well as preparation for industry certification examinations and licensure.

CNI College can also offer you access to a wide range of student services. The financial aid department is available to help determine your eligibility for financial aid, and assist you in completing the application process. You can also take advantage of the career planning services, created to help you decide which program matches your future goals. In addition, as a graduate you can enjoy employment assistance services, which include training related to resume writing, job searching, and Interviewing.

CNI College is centrally located serving all of Southern California. Located in the city of Orange in the heart of Orange County. Freeway close and plenty of parking.

RN to BSN Degree Completion Program “Bachelor of Science in Nursing”

The CNI College RN to BSN Degree Completion courses are delivered on-line and are designed to provide students with the knowledge and professional nursing skills necessary to assist patients and clients toward an optimal level of health. This program is being implemented to provide an online Registered Nurse (RN) to BSN Degree Completion option at CNI College based on the community need for a more highly educated nursing workforce.

Associate Degree Nursing Program

The Associate Degree Nursing Program is delivered in residence and on-line distance learning and is designed to prepare safe and competent registered nurses (RNs) who are able to provide quality and culturally appropriate nursing care to the patients, families, and community they serve within the context of an increasing complex healthcare environment. CNI College strives to prepare future nurses to respond to the growing complexities of the health care delivery system and who are dedicated to the promotion of human flourishing through the provision of ethical, culturally sensitive, and evidence-based nursing practice. A societal vision of health and well-being for all people guides the CNI emphasis on preparing morally reflective graduates who are leaders and life-long learners.

Vocational Nursing

The Vocational Nursing Diploma Program is delivered in residence and is designed to enable students to acquire the knowledge, skills, and competencies related to enhancing the health and well-being of individuals. The Vocational Nursing Student will learn basic nursing care skills to be competent in caring for acutely and chronically ill clients, with predictable health outcomes, in structured settings such as hospitals, skilled nursing facilities, a clinic, doctor's offices, long term care, corrections, home health care or for a nursing registry.

Surgical Technologist

The Surgical Technology Diploma Program is delivered in residence and is an 1100 hour comprehensive course of study that combines theory and clinical practice. The curriculum is designed to provide qualified individuals an opportunity to acquire the knowledge, attitudes and skills, which will enable them to become safe and competent practitioners of Surgical Technology. To become certified, graduates of the program must successfully complete the Examination conducted by the National Board of Surgical Technology and Surgical Assisting (NBSTSA). The program prepares students for entry-level positions in a number of health care facilities including hospitals, medical centers, and public and private surgical centers. The program includes a mandatory 500 hour Surgical Technology Externship that must be completed prior to graduation.

MRI Technologist

The student is taught Magnetic Resonance Imaging Technology and learns to operate the MRI scanner to produce cross sectional images of the patient for diagnostic purposes. While technologists must be proficient in understanding the MRI system, compassion and strong patient care skills are emphasized as well as being a team member alongside the Radiologist and Physician, dedicated to providing excellence in patient treatment. This curriculum is designed to provide qualified individuals an opportunity to acquire the knowledge, attitude and skills which will enable them to become safe and competent in MRI Technology and prepare the graduate for an entry-level position as a MRI Technologist. Employment opportunities for the MRI Technologist are found in Medical Clinics and Imaging Centers under the supervision of a Physician and Radiologist.

Medical Assisting

The Medical Assisting Diploma Program prepares students for entry-level positions in both administrative and clinical health care environments. It is designed to prepare adult learners to meet the requirements for employment in medical offices, clinics, hospitals, and other health care environments requiring skills in medical office procedures and clinical assisting. The program is intended for those applicants who desire a career in health services, either at the paraprofessional level or those who intend for the program to be the first step in a medical assisting career education master plan: Biller/Coder; Medical Office Receptionist; Medical Administrative Assistant; Patient Care Assistant; Rehabilitation Aide; or Medical Secretary. Emphasis is placed on the development of competencies associated with human relations, communications, critical thinking and problem solving. Practical skills as well as the complex interactions of the medical paraprofessional with the patient's family and friends are also emphasized.
