

Believing in Brighter Futures

Since 1994, CNI College in Orange County, California has been offering career-oriented programs related to the healthcare industry. CNI College is committed to providing excellent academic educational opportunities in allied health disciplines for the intellectual, social and professional development of a diverse student population. CNI is devoted to the community we serve and committed to our graduates' successful employment in the healthcare field.

By choosing CNI College for your post-secondary education, you will learn from highly qualified faculty who bring both academic and professional experience into the classroom. Each program is designed to include theory and practical training, and provide real-life experience through clinical and externship opportunities. Students will receive preparation for industry licensed or certification examinations, as they are studying to obtain their associates, bachelor's and or master's degrees.

CNI College can also offer you access to a wide range of student services. The financial aid department is available to help determine your eligibility for financial aid, and assist you in completing the application process. You can also take advantage of the career planning services, created to help you decide which program matches your future goals. In addition, as a graduate you can enjoy employment assistance services, which include training related to resume writing, job searching, and Interviewing.

If you are ready to take proactive step and start working toward your educational and career goals, start by checking out the available programs at CNI College and request more information regarding the programs that catch your interest today!

CNI College is centrally located serving all of Southern California. Located in the heart of Orange County. Freeway close and plenty of parking.

Bachelor of Science in Nursing

This 33 month pre-licensure program will be delivered in a blended format, with clinical practicums throughout. Students will engage in coursework throughout residential, hybrid, and distance education. The BSN program will prepare students to be well rounded nursing professionals throughout a combination of General Education and Core Nursing Courses.

RN to BSN Degree Completion Program "Bachelor of Science in Nursing"

The CNI College RN to BSN Degree Completion courses are delivered online with a 90 hour hands-on clinical practicum and are designed to provide students with the knowledge and professional nursing skills necessary to assist patients and clients toward an optimal level of health. This program was implemented to provide an online Registered Nurse (RN) to BSN Degree Completion option at CNI College based on the community need for a more highly educated nursing workforce.

Master of Science in Nursing program

The CNI College Master of Science in Nursing-Healthcare Leadership Program prepares students for a senior leadership roll in a fast changing, increasingly demanding healthcare environment. This program is an ideal avenue for current nurses who want to advance their careers toward leadership and make a greater impact at the management level. The online Master's in Nursing Program can help you advance your professional development and pursue a rewarding career with greater responsibilities, and job opportunities. The best part of the MSN program is the flexibility of an online modality.

Vocational Nursing

The Vocational Nursing Diploma Program is delivered in residence and is designed to enable students to acquire the knowledge, skills, and competencies related to enhancing the health and well-being of individuals. The Vocational Nursing Student will learn basic nursing care skills to be competent in caring for acutely and chronically ill clients, with predictable health outcomes, in structured settings such as hospitals, skilled nursing facilities, a clinic, doctor's offices, long term care, correction facilities, home healthcare or a nursing registry.

Surgical Technologist "Associate of Occupational Science Degree"

The AOS Surgical Technology Program is delivered in a blended format and is a 1730 hour comprehensive course of study that combines theory, lab, and extensive practice. The curriculum is designed to provide qualified individuals an opportunity to acquire the knowledge, attitudes and skills, which will enable them to become safe and competent practitioners of Surgical Technology. To become certified, students of the program must successfully complete The National Certification Examination before graduation. The program prepares students for entry-level positions in a number of healthcare facilities including hospitals, medical centers, and public and private surgical centers. The program includes a mandatory 600 hour Surgical Technology Externship that must be completed prior to graduation.

MRI Technologist "Associate of Occupational Science Degree"

The student is taught Magnetic Resonance Imaging Technology delivered in a blended format. It is a 1746 hour course of study which includes theory lab and 1000 hour of externship. The students learn to operate the MRI scanner to produce cross sectional images of the patient for diagnostic purposes. While technologists must be proficient in understanding the MRI system, compassion and strong patient care skills are emphasized as well as being a team member alongside the Radiologist.
